

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

TABLE OF CONTENTS

VOLUME 3 1902

PAGES

BLICHFELDT, H. F., of Stanford University, Cal. On the determination of the distance between two points in space of m dimensions	467-481
BLISS, G. A., of Minneapolis, Minn. The second variation of a definite integral when one end-point is variable.	132-141
BÔCHER, MAXIME, of Cambridge, Mass. On the real solutions of two homogeneous linear differential equations of the first order.	196-215
BOLZA, O., of Chicago, Ill. Proof of the sufficiency of Jacobi's condition for a permanent sign of the second variation in the so-called isoperimetric problems	305-311
BROWN, E. W., of Haverford, Penn. On the small divisors in the lunar theory	159-185
DICKSON, LEONARD EUGENE, of Chicago, Ill. The groups of Steiner in problems of contact	38- 45
————— On the group defined for any given field by the multiplication table of any given finite group	285-301
————— The groups of Steiner in problems of contact (second paper).	377-382
EISENHART, L. P., of Princeton, N. J. Conjugate rectilinear congruences.	354-371
EMCH, ARNOLD, of Boulder, Col. Algebraic transformations of a complex variable realized by linkages	493-498
FITE, W. B., of Ithaca, N. Y. On metabelian groups	331-353
GALE, ARTHUR SULLIVAN, of New Haven, Conn. On the rank, order and class of algebraic minimum curves	451-466
HADAMARD, J., of Paris, France. La théorie des plaques élastiques planes	401-422
HASKINS, CHARLES NELSON, of New Bedford, Mass. On the invariants of quadratic differential forms	71- 91
HATHAWAY, A. S., of Terre Haute, Ind. Quaternion space	46- 59
HAWKES, H. E., of New Haven, Conn. On hypercomplex number systems	312-330
HUNTINGTON, E. V., of Cambridge, Mass. A complete set of postulates for the theory of absolute continuous magnitude	264-279
————— Complete sets of postulates for the theories of positive integral and of positive rational numbers	280-284

	PAGES
HUTCHINSON, J. I., of Ithaca, N. Y. On a class of automorphic functions	1- 11
LEHMER, D. N., of Berkeley, Cal. Constructive theory of the unicursal cubic by synthetic methods	372-376
MASCHKE, HEINRICH, of Chicago Ill. On superosculating quadric surfaces	482-484
MCCLINTOCK, E., of New York, N. Y. On the nature and use of the functions employed in the recognition of quadratic residues.	92-109
MILLER, G. A., of Stanford University, Cal. On the groups of order p^m which contain operators of order p^{m-2}	383-387
MOORE, ELIAKIM HASTINGS, of Chicago, Ill. On the projective axioms of geometry	142-158
————— A definition of abstract groups	485-492
MOULTON, F. R., of Chicago, Ill. A simple non-desarguesian plane geometry	192-195
SCOTT, C. A., of Bryn Mawr, Penn. On a recent method for dealing with the intersections of plane curves	216-263
————— On the circuits of plane curves	388-398
————— Note on the real inflexions of plane curves	399-400
STECKER, HENRY FREEMAN, of Ithaca, N. Y. Concerning the existence of surfaces capable of conformal representation upon the plane in such a manner that geodetic lines are represented by a prescribed system of curves	12- 22
STOLZ, O., of Innsbruck, Austria. Zur Erklärung der Bogenlänge und des Inhaltes einer krummen Fläche.	23- 37
————— Nachtrag zum Artikel: „Zur Erklärung der Bogenlänge,” u. s. w. (dieses Bandes, S. 23 f.)	302-304
VAN VLECK, EDWARD B., of Middletown, Conn. A determination of the number of real and imaginary roots of the hypergeometric series.	110-131
WILCZYNSKI, E. J., of Berkeley, Cal. Reciprocal systems of linear differential equations	60- 70
————— Covariants of systems of linear differential equations and applications to the theory of ruled surfaces	423-450
YOUNG, J. W., of Ithaca, N. Y. On the holomorphisms of a group.	186-191
Notes and errata: volumes 1, 2, 3	499-501
